

NEW PRODUCT ALERT

Introducing the New 6 Volt Solar Electric Fence Energizer

POWER WIZARD[®]
SHOCK TECHNOLOGY
www.PowerWizardInc.com

PW50S - 6 Volt Solar

Specifications

- Controls 1 to 3 Acres
- 0.06 Joule Output
- Low Impedance Technology

Featuring

**Easy Battery Check
& Battery Saver**

Features

- Energy efficient and environmentally friendly solar unit
- 6 volt battery included and installed
- Easy battery check and battery saver
- Built-in handle for easy transport
- Built-in mount fits to t-posts, round posts, wood posts and flat surfaces
- Ideal for small animals with limited usage for cattle and horses
- Recommended with steel or aluminum wire and clean fence conditions
- 3 year warranty including lightning damage; longest warranty in the industry

Easy Battery Check

Test your battery while it's in your energizer. We are the first energizer company to add the easy battery check. Determine the battery voltage within 15 seconds by turning the energizer on, counting the number of flashes from the lens, then referring to the label on the side of the energizer.

Automatic Battery Saver

Conserve energy when there are too many cloudy days. The PW50S energizer senses the low battery voltage, and extends the pulse off time to conserve the battery. The pulse time will start at 1.4 seconds between pulses for a fully charged battery, and will automatically adjust to 2 seconds for a battery that is almost drained.

What is low impedance?

Low impedance refers to the technology that enables the fence energizer to deliver an effective shock even when moderate vegetation is in contact with the fence.

What is a joule rating?

A joule is a measure of electrical energy. Power Wizard energizers are rated in output joules, indicating the energy/power of the fence energizer and the fence wire. The higher the joule rating, the higher the shock pulses and the more powerful the fence energizer.
