

Ultimate Lubricating Fluid with CERFLON® (Mfg # 98212)

Star brite's Ultimate Lubricating Fluid with CERFLON® and Lanolin creates a super-slick film that repels water, snow, grass clippings and more. It lubricates, penetrates and protects metals against corrosion.

CERFLON Nano-Tech particles bond to treated surfaces for long-lasting, unsurpassed lubricity of all metal moving parts while Lanolin repels moisture. The result is an all-season lubricant/protectant for agricultural equipment, construction tools, outboard engines and all other equipment exposed to the elements

- Apply to mower deck blades and chains to prevent grass, hay and other clippings from adhering
- Apply to snowplow and snowblower blades to prevent ice and snow from adhering
- Apply to metal parts for long-lasting lubrication and protection against rust and corrosion
- Apply to rusted surfaces to help prevent further rusting and damage
- Also ideal for use on lawn equipment, tools, fishing gear, firearms, motorcycles, ATVs, snowmobiles, cars, outboard engines and more
- The dielectric formula is ideal for forming a barrier against moisture and corrosion on battery terminals, junction blocks and wiring

Ultimate Lubrication Fluid penetrates to loosen frozen bolts and displace moisture. Formulated to provide a micro-thin film that seals the treated surface for long-lasting lubrication and corrosion protection. CERFLON® nanoparticles

DIRECTIONS: Shake well before using. Spray directly onto surface to be treated and wipe up excess or overspray. Use as often as needed to help prevent snow, ice or grass clippings from adhering to treated surfaces.
