Use Considerations

- Know your loads
- Always use in straight line pulls
- Do not pull over corners or sharp edges
- Do not shock load cable assembly
- Use with slow steady pulls
- Not recommended for overhead lifting
- Never stand in line with a tension pulled cable assembly
- Do not wrap wire rope assembly around loads or attachments
- Do not connect hook back onto wire rope
- Inspect wire rope assembly before each use
- Do not use a cable assembly that has been damaged, altered, or shows signs of excessive wear/corrosion
- Make sure that hook and/or eye is seated securely to loads before tensioning
- Always use compatible attachments and rigging hardware
- After use, clean excessive water/soil and store in a dry place
- A light coat of oil will help prolong the life of this wire rope assembly
