

TPX-1 INSTRUCTIONS

1. Rest TPX-1 on top of gate with large end toward latch. Loosely attach large end to the gate frame using #10 x 1-1/2" bolt & lock nut.

2. Extend TPX-1 so that U-bolt can be used to attach small end of TPX-1 to the gate frame just inside of the end bar on hinge side.

3. Tighten both #10 bolts and U-bolt nuts so that extension will be firmly attached.
