Power Pet Fully Automatic Pet Door

Featured on HGTV, Discovery Channel, and numerous other TV news channels, **POWER PET™** is the world's largest selling electronic pet door brand. Professionally engineered for performance, value and extreme reliability, the POWER PET™ door is in a class of its own. While other so-called electronic pet doors on the market say they're automatic, they merely unlock a hinged panel.

The patented POWER PET™ electronic pet doors don't just lock and unlock. They are motor driven and fully-automatic to open completely under their own power. The motorized, translucent door panel is made of a new, super-strength, military-grade, resin. It won't break, crack or discolor, even in extreme heat and cold. Activated by the pet's tiny ultrasonic collar, the air-tight panel quickly and quietly powers upward, disappearing into the stylish housing.

Motorizing the panel has many benefits. Because the panel moves up and down and does not swing out, it can be mounted in hermetically sealed grooves for absolutely air-tight closure, resulting in the best insulated pet door made. In fact, POWER PET™ doors insulate better than the best dual-flap pet doors, protecting against extreme cold and windy conditions. Mounting the rigid panel in grooves also makes it nearly impossible for an intruder to kick it out. There's one, and only one way, the panel can be opened. It must slide upward. An auto-locking, steel dead-bolt makes that impossible without engaging the motor.

POWER PET™ doors also feature a patented directional sensing system that opens the panel only when the pet is on a direct approach, not when he is just wandering by, sitting or sleeping next to the door. Dual range controls allow setting independent inside and outside activation distances. Four-way access control lets you select from **In Only**, **Out Only**, **Full Access** or **Closed & Locked**.

The POWER PET™ door may be operated on AC house current with the included AC wall adapter, or on an optional, auto-recharging back-up battery, which ensures that the door will work in the case of a power outage. The AC wall connection can be removed to allow operation of the door with the battery only by adding the optional battery charger kit.

The POWER PET™ door package includes everything needed for a secure, lockable installation.

FEATURES:

- The only fully automatic pet door on the market today.
- Medium size accommodates pets up to 30 lbs.
- Large size accommodates pets up to 90 lbs.
- Installs as easily as any conventional pet door.
- Pre-fabricated Outside Frame is included for easy, professionally finished installations.
- In-wall installations are easy with the optional pre-fabricated Wall Adapter Tunnel.
- An optional, auto-recharging back-up battery can operate the door in the case of a power outage.

Kit Includes:

- Med. or Large POWER PET Door
- Pre-Fabricated Outside Frame
- MS-4 Ultrasonic Pet Transmitter Collar
- 110 Volt AC Adapter
- Locking Pin Assembly
- Mounting Hardware
- Installation Manual

2 Sizes

- Medium (up to 30 lbs)
- Large (up to 90 lbs)

2 Models

- Door
- Wall (Requires optional wall tunnel)

Power Pet Fully Automatic Sliding Glass Pet Door

The POWER PET™ doors are also offered in a sliding glass door model that is very sophisticated and easy to install. Because the door is pre-installed in an aluminum framed glass insert panel, which fits alongside most sliding glass doors, it is simply a matter of adjusting a few thumbscrews to activate a spring-loaded device that holds the door securely in place. When the door is installed, it is amazingly sleek, seeming to disappear and become part of the existing sliding glass door.

The sliding glass model comes in 2 sizes, with 3 heights in each size. Each height has a 2-1/2" adjustment range. With this wide choice of sizes, almost any existing sliding glass door can be accommodated. We also offer a new E-glass model for extremely hot, sunny locations.

FEATURES:

- Pre-installed in an aluminum-framed, glass insert that fits perfectly into a sliding glass patio door.
- Complete kit includes everything needed for a fully weather-sealed, lockable installation.
- Fits into all track widths.
- 3 height ranges - 75" to 77-1/2"; 78 3/4" to 81 1/4"; or 93-3/4" to 96"
- 2 widths - 13" on the Medium size door, 18" on the Large size.
- Slim design has depth of only 3".
- Medium accommodates pets up to 30 lbs.
- Large accommodates pets up to 90 lbs.

Kit Includes:

- Aluminum framed glass insert
- Medium or Large POWER PET™ door
- Pre-Fabricated Outside Frame
- MS-4 Ultrasonic Pet Transmitter Collar
- 110 Volt AC Adapter
- Locking pin assembly
- Weather sealing kit
- Mounting hardware
- Installation Manual

2 Sizes
