# TFI SHIPPING DEPARTMENT TO INSTALL TOOL BOX TO L-SHAPE REF TANK!

**TOOLBOX FOR 100 GALLON L-SHAPE REFUELER. READ THE FOLLOWING PROCEDURES CAREFULLY BEFORE STARTING THE INSTALLATION.**

1. Remove 3/8"-16 bolts and lock washers form toolbox shell along with the bracket.
2. Remove red lining on the double sided tape from the bottom of the toolbox.
3. Place the toolbox into position on the tank. Move the tank until it is in the correct position.

**CAUTION: ONCE THE TAPE STICKS IT WILL BE DIFFICULT TO REMOVE.**

4. Slide the brackets you removed from the toolbox earlier down through the metal loop on the tank. The hook on the bracket will secure the toolbox to the tank once bolted on.
5. Install the bolt and lock washer onto the bracket ensuring that the bracket is hooked onto the tank and tighten down. Refer to instruction sheet #484 for proper torque specs.
6. Repeat steps 4 and 5 for the opposite side of the toolbox.
