

TWO-CYCLE OIL

available at

APPLICATIONS

- * For use in **all** two-cycle engines regardless of brand, model, or mix ratio. Simply mix 1 pouch per gallon to cover **any** mix ratio from a single can.
- * Lawnmowers, chain saws, motorcycles, outboards, ATVs, snowmobiles, personal watercraft, trimmers, edgers, snow throwers, rototillers, log splitters, go-karts, etc...

FEATURES & BENEFITS

- * **SIMPLE** - single mix for **all** air & water cooled two-cycle engines
- * Easy-measure pouches - just add 1 pouch per gallon of gas
- * Exceeds all OEM specifications (ISO-L-EGD++)
- * Smoke-free operation - cleanest burning 2-cycle oil available
- * Contains 24-month fuel stabilizer
- * Simple mixing instructions in English, Spanish and French
- * Improved engine performance
- * Longer engine life
- * Compatible with oxygenated fuels
- * Anti-wear properties
- * Anti-corrosion protection
- * Greater horsepower

any mix, any model, any brand

USZ TWO-CYCLE OIL

TECHNOLOGY

- * Specialized two-cycle lubricant that exceeds O.E.M. performance standards and exceeds highest global oil standards
- * Reduces oil consumption and exhaust emissions
- * Improves performance
- * Reduces break-in period

GENERAL INFORMATION

- * One mix for **all** two-cycle equipment
- * Environmentally friendly (less exhaust)
- * Gasohol compatible

GLOBAL STANDARDS FOR 2 CYCLE LUBRICANTS

INTERLUBE OPTI-2 TECHNOLOGY	→	HIGHEST . . . Anti-wear properties Anti-corrosion protection Fuel Stabilization
ISO-L-EGD ++ 346 & 372 CHAIN SAW TEST	→	IMPROVED . . . Lubricity, anti-scuffing Detergency, anti ring sticking
ISO-E-GD (EUROPEAN O.E.M.'S) JASO FD	→	IMPROVED . . . Detergency and high temperature performance
JASO FC MINIMUM JAPANESE OEM RECOMMENDATION	→	ESTABLISHED MINIMUM PERFORMANCE FOR . . . Detergency, lubricity, smoke, port blocking
JASO FB API TC/TB/TA	→	NO LONGER RECOMMENDED FOR BEST PERFORMANCE IN NEW ENGINES

THE DEMANDS ON TWO CYCLE ENGINES HAVE INCREASED DRAMATICALLY RESULTING IN A PYRAMID OF LUBRICANT PERFORMANCE LEVELS.
