

THINK OUTSIDE THE HIVE

INSTRUCTIONS

HELP THE GLOBAL
BACKYARD

BEE HOUSE PLACEMENT

- 1.) Select a location facing early morning sun to awaken and warm your bees.
- 2.) Position house at eye level, 5-7 ft. (1.5-2 m) from ground, for easy viewing and protection from pests.
- 3.) Locate the house within 100 - 300 ft. (30-91 m) of a pollen and mud (for spring mason bees) source.
- 4.) Remove base cap. Secure to wall, fence, or flat surface using screws or nails (not included).
- 5.) Gently push the BeeHut housing into the mounted base cap

BEE-READY GARDEN

1. Eliminate or lessen yard chemical use
2. Have tender plant leaves nearby for the summer leafcutter bee to use as nesting material
3. Plant a fruit and vegetable garden and enjoy extra food!

GENTLE & Solitary Native bees
BETTER Pollination = More food
EASY & Fun to Raise

GOT BEES? PLACING BEES & BEE TUBES

- 1.) Open bee box or bag of cocoons and place in rear of BeeHut house.
- 2.) Carefully insert spring or summer tubes (open ends facing entrance) into BeeHut, taking care not to crush cocoons.
- 3.) Remove bee tubes when bee activity ceases. Store filled tubes in a BeeGuardian bag until harvest.
- 4.) View <http://crownbees.com/harvest-cocoons/> for detailed instructions and videos.
