Note: Fasteners typical both sides

①	Qty. (6)	Hex Bolt M12 X 1.75 X 40	②	Qty. (6)	Conical Washer 1/2
---	----------	--------------------------	---	----------	--------------------

1. If vehicle is equipped with a fuel tank skid shield, remove six (6) M12 fasteners holding skid shield to vehicle frame rails and discard bolts.
2. Raise hitch into position and install fasteners as shown above. Fuel tank skid shield will be sandwiched between hitch and vehicle frame rails.

Tighten all M12 CL8.8 fasteners with torque wrench to 68 Lb.-Ft. (92 N*M)

Note: check hitch frequently, making sure all fasteners and ball are properly tightened. If hitch is removed, plug all holes in trunk pan or other body panels to prevent entry of water and exhaust fumes. A hitch or ball which has been damaged should be removed and replaced. Observe safety precautions when working beneath a vehicle and wear eye protection. Do not cut access or attachment holes with a torch.

This product complies with safety specifications and requirements for connecting devices and towing systems of the state of New York, V.E.S.C. Regulation V-5 and SAE J684.
