

Tractor Tool-Tray™

Model TT400*

www.GreatDayInc.com

Anyone who has ever spent time on a tractor or lawnmower understands the need to have quick access to hand tools. With Great Day's new universal-fitting Tool-Tray, tools are only an arm's length away.

*Shown in *www.av* with *www* fastening clips

The Tool-Tray is ideal for carrying hand tools such as wrenches, hammers, chains, hitch pins, etc. It is also large enough for a small cooler or tool box.

The Tool-Tray basket measures 24" long x 10" high x 10" deep and attaches securely to the tractor or lawnmower's roll-bar. The frame of the Tool-Tray is constructed of heavy-duty aircraft aluminum and enclosed with 3/4 inch raised expanded aircraft-grade aluminum. The unit is finished with super-strong, rust-proof powder-coat enamel.

It also includes a leveling mechanism to adjust to roll bars that are not perfectly vertical. The attachment bar expands from 25" to 45" (inside measurements) to fit all category 1 tractors that do not have cab enclosures.

Moldable, Velcro-fastening clips for transporting long-handled tools such as shovels, Kaiser blades, pole saws, axes and hoes are available as an additional add-on to the tray for separate purchase. The clips are also suitable for carrying a firearm.

As always.....MADE WITH PRIDE IN THE USA!
