

Center-Lok

Overhead Gun Rack for Tactical Weapons

Model CL1502T

The Center-Lok Model CL1502T Overhead Gun Rack is designed to transport tactical-styled firearms in *full-size* crew cab pickup trucks with center door posts. With Great Day's patented "Opposing Forces" installation system, the Center-Lok Gun Rack can be installed or removed in an amazing two minutes! No drilling, no bolts or screws required.

The Center-Lok is designed specifically to accommodate the unusual shape of tactical weapons. The weapons are positioned snugly against the truck's headliner in cushioned, moldable cradles---out of sight of passers-by. Instant access to the weapons is as easy as pulling two Velcro tabs.

The CL1502T is constructed of super-strong aircraft and comes with a lifetime warranty against defects in workmanship or materials.
