### **Care & Maintenance**

- Before using, clean the product completely with a soft, dry towel. When not in use, wipe free of any dirt or loose objects, wash with a mild solution of soap and water; rinse thoroughly and dry completely.
- Do not use strong detergent or abrasive cleaners.
- Do not machine wash.
- Bolts can loosen over time. Be sure to check bolts occasionally, tightening as needed.
- Protecting furniture from the elements, when not in use is highly recommended.
- Our iron/steel components for garden accessories and patio items are coated with rust inhibiting paint that protects it from rusting. However, due to the nature of iron, surface oxidation (rusting) will occur once these protective coatings are scratched. This is a natural process and is not a defect! To minimize this condition, we recommend care when assembling & handling the product to prevent scratching the paint. Should any scratching or damage occur, we recommend immediate touch-up with rust inhibiting paint. Surface rust can also be easily removed with a very light application of common cooking oil. If surface oxidation (rusting) occurs and if no measure is taken to prevent this, the oxidation may start dripping on to deck or patio and cause damaging stains, which may be difficult to remove. This can be prevented if measure is taken to keep the product from oxidizing.
