FEATURES

- Each pump now has an internal fan which cools the pump during operation by up to 50%.
- Upgraded Pressure Switch for longer life.
- Motor windings have been increased to help dissipate heat
- All models are now fuse protected

Demand switch models operate only when liquid flow is required. Pump and motor stop instantly when discharge is closed. Diaphragm design eliminates troublesome shaft seal. Pump can be run dry without damage. Ball bearing drive assures longer pump life. Excellent self-priming capability. Santoprene diaphragms and viton valves are standard. Maximum temperature of pumped liquid 160°F (71°C). Permanent magnet motor and longer life brushes.
