

CLIPPER AND TRIMMER MAINTENANCE

KOOL LUBE® 3 SPRAY COOLANT

Kool Lube® is especially formulated to instantly cool down the cutting blades providing more comfort to your client. This is an effective solution for heavy duty clippers blade heat. A simple spray on the top and bottom of the blades can help reduce the heat build-up down to a comfortable level.

How to apply

- Should be used with any high-performance clipper
- While the clipper is running, hold can about 6 inches away from blade and spray the underside and topside of the blade in-between cuts.
- It is not necessary to remove the blade while using Kool Lube®
- ideal application time is anytime the clipper blade feels warm.
- Always spray the clipper blade with Kool Lube® when changing comb attachments from one size to the next.

Benefits

- Instantly cools the cutting blade
- Gives light lubrication allowing the blade to run cooler and stay sharp longer

MODEL 76300-101-004

SPRAY DISINFECTANT

The Spray Disinfectant kills germs, bacteria, viruses and fungus and deodorizes the tools. Blades should be cleaned and disinfected in between clients.

How to apply

- While tool is running, spray both the underside and topside of the blade
- Should be applied on the blades before using tool on a new client

Benefits

- Disinfects and deodorizes all grooming tools

MODEL 76300-102-000

BLADE WASH® Cleaner

Blade Wash® cleaner helps to remove hair clippings and any build-up on the blades. Clean blades stay sharp longer and run cooler.

How to apply

- Pour about a half inch of Blade Wash® into a small bowl
- Attach a blade onto your clipper while tool is running and completely submerge CLIPPER BLADE into the bowl of liquid
- Let it run submerged for about 10 seconds
- Dry blade off with a towel and follow with applying Spray Disinfectant and Blade Lube®. (As directed)

Benefits

- Washing your blades weekly will help keep them sharp and avoid build-up of product to keep them running cooler, longer

MODEL 76300-104-000
4 oz.

MODEL 76300-106-000
1/2 oz.

BLADE LUBE LUBRICATING OIL

Oiling the blades is essential to keep them sharp and running smoothly while helping to prevent high heat build-up.

How to apply

- While tool is running, apply a drop of oil to each side and to the center
- Turn tool sideways to allow the oil to equally distribute on the blade
- Use towel to wipe off any excess oil
- Apply oil just before all cuts to ensure the maximum benefits

Benefits

- Allows blade to run cooler throughout the duration of the cut and stay sharper longer

GEAR LUBE™ GREASE

- Premium clipper grease
- Scientifically prepared for all universal motors
- 1.25 oz tube
