

Canine Kennel-Jec® 2

No needles. Safe & effective.

2-WAY PROTECTION

Kennel-Jec® 2 is an intranasal vaccine recommended for immunization of healthy puppies and dogs against Canine Cough Complex (Kennel Cough) caused by Bordetella bronchiseptica and Parainfluenza 3.

- Effective protection against Canine Cough
- No needles. Safe & effective.
- Easy-to-use intranasal vaccine
- Meets or exceeds all USDA standards

Packaging

Single dose with nasal pipette - 100 doses/display
UPC# 7-45801-41104-3

Indications

For vaccination of healthy, susceptible dogs and puppies as an aid in the reduction of Canine Upper Respiratory Infection (Canine Cough) caused by canine parainfluenza and Bordetella bronchiseptica. Field studies support the safety of Kennel-Jec 2 when administered to puppies as young as 3 weeks of age.

Directions and Dosage

Rehydrate the vaccine with the accompanying sterile diluent. After rehydration, extract entire contents with the nasal pipette and administer entire dose intranasally. Do not vaccinate puppies under 3 weeks of age. Puppies vaccinated between 3-6 weeks of age should be revaccinated at 6 weeks. Annual revaccination is recommended.

Precautions

For intranasal use in dogs only. Do not vaccinate dog parenterally. Store out of direct sunlight at 35-45° F (2-7° C).

Burn containers and all unused contents. A very small percentage of dogs may show sneezing, coughing or nasal discharge for 3-10 days following vaccination. While these are usually temporary symptoms, antibacterial therapy may be indicated. Anaphylactoid reactions may occur. **Antidote:** Epinephrine. **Preservative:** Neomycin
