RMC-95C6

GHP Indoor Kerosene heaters are the ideal choice for indoor safe supplemental heating. These heaters are great for use in your home, basement, garage, or at the cabin. Because these heaters do not require electricity to operate (batteries included), they make an excellent choice for both everyday zone heating as well as for emergency situations when the power goes out. Indoor kerosene heaters use ONLY 1 K kerosene, burn with 99.9% efficiency, and operate with a push button on and off design.

- Ideal for workshops, basements, cottages, RV's, and more
- High power unit operates 12 hours on one full tank of kerosene
- Economical - 99.9% fuel efficient
- Easy to use automatic ignition and one-touch shut-off
- Built-in safety switch shuts power off if unit is knocked over
- Convenient handle design
