

# 400A – Universal Fill Valve

Fluidmaster's 400A Universal Toilet Fill Valve is the #1 best selling fill valve in the world! This is an anti-siphon design with an adjustable height from 9" to 14".

Fluidmaster recommends using the 400A fill valve in toilets that date prior to 1994 with flush volumes between 3.5 and 7 gallons per flush.

- Replaces ballcocks and other older valves
- Best for older toilets (pre 1994)
- Easy to install
- Height adjusts 9"-14"
- Refills quickly
- Corrosion-resistant material
- Code approved
- Anti-Siphon design – Won't contaminate fresh water supply
- Some toilet models not supported: Flapperless, Low Boy 1 Piece Toilets and Side Entry Valves.
- Fits all brands
- Five year warranty
