

Safe-T-Post Caps™

Protect your valuable horses!

Patented

Horses will be horses -
and a lot of horseplay includes running along fence lines. When horses are frightened, playing, or interacting with other horses nearby, they are likely to be injured on sharp T-posts. Replacing all metal T-posts is not an option for most horse owners, and that's where ***Safe-T-Post Caps™*** come in.

- - tough, puncture resistant vinyl construction
- attractive, bright white color enhances visibility
- material resists Ultraviolet degradation
- elastic material and special cross section fits most steel T-posts
- tapered shape installs easily, yet grips tightly
- adhesive may be used if permanent installation is desired

Safe-T-Post Caps™ are great for a wide variety of other uses, such as silt fence, barrier fence, and tree stakes - anywhere the sharp tops of T-posts present a hazard.
