where animals burrow

ACTIVE INGREDIENT:  
Castor Oil ..... 10.0%  
\*INERT INGREDIENTS: ..... 90.0%  
TOTAL ..... 100.0%  
\*Inert Ingredients: Fuller's earth and Water

**People & Pet Safe** when used  
as directed

Keep Out Of Reach Of Children  
**CAUTION** (See back panel for additional  
Precautionary Statements)

Effectively rids lawns and ornamental planting areas of Moles, Voles, Gophers, Armadillos, Ground Squirrels, and other burrowing animals.

This product can be safely used around children and pets, when used as directed. This product is biodegradable and will not harm lawns, ornamentals, flowerbeds, or other desirable plants.

**Directions for Use:**

Apply 2 lbs. of product per 1,000 sq. ft. and reapply every 2-3 months to ensure consistent repellency. This product can be applied directly from the bag or by using a broadcast or drop spreader.

**For Lawns:**

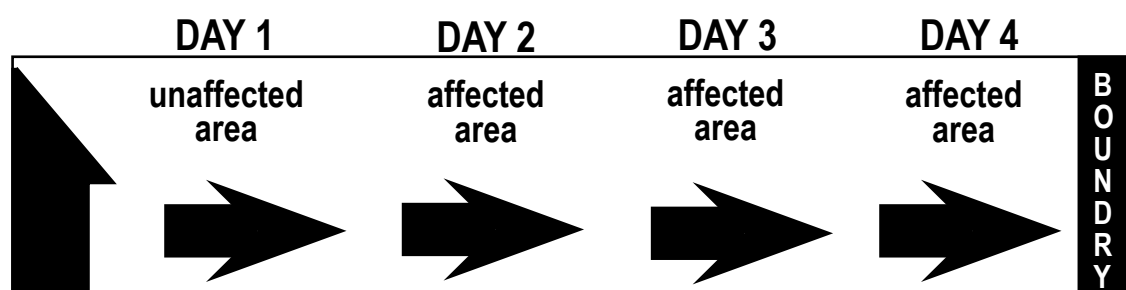

Locate active mole areas and runways to determine which way to push the moles out of your yard. Next, protect the areas that are not yet invaded by the moles. Then, direct the moles away from the lawn by treating the lawn in stages.

**Day 1:** Spread the granules over the areas not yet invaded by the moles. Lightly water in the granules for approximately 10-15 minutes after application.

**Day 2:** Spread the granules over the second area away from the undamaged lawn and towards the boundary of the lawn. Lightly water in the granules for approximately 10-15 minutes on the same area as day 1, PLUS the second area to get the moles moving.

**Day 3:** Spread the granules over the third area away from the areas previously applied and towards the boundary of the lawn. Lightly water in the granules for approximately 10-15 minutes on the same areas as day 1 and 2, PLUS the third area.

**Day 4:** Spread the granules over the fourth area away from the areas previously applied and to the boundary of the lawn. Lightly water in the granules for approximately 10-15 minutes on the same areas as day 1, 2, and 3, PLUS the fourth area.

**TIP:** Throughout the process, punch holes into the mole tunnels every 4-6 feet and place 2-4 tablespoons of the granules directly into the tunnel.

The following chart can be used as a guide in establishing an accurate rate of this product. Applications will vary depending upon speed, equipment wear and condition of spreader. If uncertain about proper spreader setting, begin at the lowest setting that allows the product to flow evenly through the spreader, and apply 2 lbs. per 1,000 sq. ft., going over the area to be treated, twice if necessary.	DROP SPREADERS	SETTING
	Republic EZ #530	5
	Scotts AccuGreen	4
	Sears Drop	4
	ROTARY SPREADERS	
	Earthway	7
	Republic EZ #540	2
	Scotts SpeedyGreen	4
	Sears Rotary	2

**For Ornamental Flowers and Shrubs (such as Roses, Azaleas, Rhododendrons, Mums, etc.):** Apply 2 tablespoons to the bottom of the planting hole and 3-4 tablespoons to the soil mix before back filling.

**For Bulbs:** After placing bulb in hole, apply 1 tablespoon of product into the hole, making sure granules surround the bulb then backfill with soil.

**First Aid and User Precautions:**

**CAUTION:** Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, flush with plenty of water, seek medical attention if irritation persists. In case of skin irritation, wash area thoroughly with soap and water, seek medical attention if irritation persists.

**Storage and Disposal:** Store and transport in an upright position. Store only in original container, in a dry place inaccessible to children and pets. Do not reuse empty container. Discard empty container in trash.

**Other precautions:** Do not apply directly to water.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.
