FUEL FILTER

- Fits internal combustion engines.
- Prevents dirt and other particles in fuel tank from reaching carburetor.

▲ CAUTION:

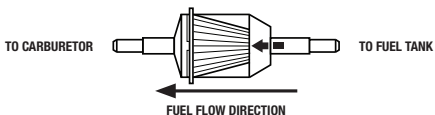

Disconnect spark plug wire before working on engine. Be certain engine is cold.

HOW TO INSTALL:

1. Shut off fuel connection or empty fuel from tank.
2. Remove old filter and replace new one in same manner.
3. If not originally equipped with a filter, locate the fuel line coming from the carburetor. Carefully cut the fuel line in the appropriate place and secure each end with the proper fuel line clips or clamps.
4. Once both ends of the fuel line are secured, take the new fuel filter and slide the line over the nipples on each end of the filter. Secure the line to the nipples with the proper fuel line clips or clamps.
5. Reconnect spark plug wire.

FILTER SHOULD BE REPLACED EACH SEASON.

NOTE: Consult operator's manual for replacement instructions specific to your equipment.
