## CALIFORNIA WHITE

The California White is a very quiet bird that is easy to handle and cold hardy. They are a hybrid type of white egg layer, which gives you prolific egg laying along with superior vigor and hardiness. They enjoy free range environments, but are adaptable to confined living as well. The California White is a vocal chicken and active forager. They are a fast growing bird, but due to their vigor they may not grow quite as quickly as the typical commercial Leghorn.

Main use – E

Egg Production – VH
