

PEARL OR WHITE GUINEAS

All guineas originally came from Africa and have been prized for their all-dark, gamey tasting meat. Guineas are extremely hardy and are very easy and inexpensive to raise and grow. Guineas are the ultimate farmyard watchdog, sounding the alarm whenever anything out of the ordinary occurs. They will consume large amounts of insects, especially ticks, and seldom bother gardens or flowers. They are also useful by eating weed seeds. Guineas are highly social and tend to move together as a flock.
