

PRODUCTION RED

The Production Red is very similar to a Rhode Island Red but typically have Leghorn incorporated into their breeding to increase egg production and are often lighter in color to the classic breed. Production Reds are a vigorous, hearty chicken developed for the purpose of efficient production of large brown eggs. Hens are not known to be very broody and are not good mothers as the traditional Rhode Island Red hen can be.

Main use – M/E

Egg Production – H

Size and color – L-XL/Brown

Best kept free range or confined; cold hardy and heat tolerant.
