

SEX LINKS – BLACK, GOLD, RED

The Sex Link Hybrid is the result of crossing two purebred standard breeds creating chicks that can be sexed at hatching. Blacks are a cross between a Rhode Island Red or New Hampshire rooster and a Barred Rock hen. Golden sex-links are a cross between a Rhode Island Red and a Rhode Island White. Red sex-links are a cross between a Rhode Island Red or New Hampshire rooster and a White Rock, Silver Laced Wyandotte, Rhode Island White or Delaware hen. These hybrids make for very vigorous chicks, rugged brown egg laying hens and good cockerel fryers. Hens often produce 300 eggs a year or more.

Main use – M/E

Egg Production – VH

Size and color – L-XL/Brown

Best kept free range and confined; heat tolerant.
